

## Fire Risk Assessment

This course provides a comprehensive look at the concept of fire risk assessment. The course focuses on those preventive and protective fire safety measures that will help to effectively reduce the level of fire risk. Course material and handouts are used with reference to current legislation and 'best practice' guidance. Delegate understanding is tested by a short written assessment

**Course Duration:** 1 Day

**Certification:** Fire Risk Assessment Certificate

### Course Outcomes:

At the end of the course each delegate will:

- State the key legal requirements in connection with fire risk assessment and recognise and define relevant terminology relating to the principles of fire risk assessment
- Identify two 'best practice' examples of fire risk assessment methodology, and appropriate sources of guidance and apply the (HSE) five step approach to the process of fire risk assessment
- Effectively document the essential elements of a fire risk assessment and identify and apply effective 'follow-up' actions subsequent to a fire risk assessment

### Pre-requisites:

- It is recommended that delegates have previously attended a Fire Warden Course

### Target Audience:

- This training will benefit managers and others who are responsible for conducting or reviewing fire risk assessments for offices, small retail and similar premises. The course will also prove an invaluable insight for those managers looking to engage the services of another organisation to carry out their fire risk assessment work closely on fire safety matters with such a 'Responsible Person'

### Course Accreditation:

- Fire Risk Assessment Certificate, which First Rate Training currently validates for 3 years.

### Course Summary:

- To provide delegates with the knowledge and understanding to undertake fire risk assessments in offices, small retail and similar premises
